to be good-perticularly for infants. But of this Syrup we can speak ifrom knowledge; in our own family it has proved a blessing indeed, by giving an infant troubled with colic pains quiet sleep, and its parents unbroken rest at night. Most parents con appreciate these blessings. We are entirely opposed to the provshout practice of drugging infants, and would sooner lose our sight's rest than consent to such a course. But here is an article which works to perfection, and which is harmless; for the sleep which it affords the infant is perfectly natural, and the little oberab awakes so "bright so a button." And during the process of teething, its value is incalculable. We have frequently heard mothers say they would not be without it from the birth of the shild till it had infehed with the teething sloge on any consider-

THURSDAY, Dec. 27-1. M The stock market opened with a strong feeling this morning, with little or no resistance from the bears.

The business, however, was not large, the commission houses having but few orders; and the demand is mainly to cover maturing contracts and on foreign orders. Numerous orders to purchase Krie and Illinois Central have been received by the recent steamers and purchases of the latter carried the price up to 691. against 664 yesterday. The foreign demand for Erle appears likely to absorb all the cash stock on the market. The amount affoat has never been so small since the road existed. As the call proceeded the market presented a more cheerful appearance than for many days past, with a fair amount of transactions. With one exception, the bears did not appear disposed to operate, excepting with caution. Between the Boards there was nothing of importance done, and prices remained substantially as at the First Board, Consideratio excitement was occasioned by the announcement of the evacuation of Fort Moultrie, but the effect upon stocks was not marked. At the Second Board, however there was a heavy feeling, with some activity, and the bears exhibited more courage in offering sollers options, for which they found little or no market. The quotations generally at the close of the regular seadon stand at something off the morning prices. Later in the day, however, operators took a more favorable view of the movement in Charleston harbor, as calculated to prevent rather than produce a collision, and the market generally advanced to the top prices of the morning, closing with much activity, but strong. State Stocks were dull, except Missouri 6s, of which \$60,000 were sold at 68 2 69, closing at 681 against 69 yesterday. The demand for untainted bonds to cover contracts assists largely in sustaining the price. Government bonds are steady. The 5e of 1874 sold at 95, and \$50,000 of 1871 privately at 90. The transactions in Railroad bonds are quite limited, but the market le very firmly held. The closing prices were: U.S. 50 1874, 95@96; Tennesses 6'e, 75@79; Virginia 6's, 746 79! 348 87; Balance, \$2,467,368 01.

The third week of December on the Southern Michigan Railroad shows about \$500 increase on the same same time last year. The Cleveland and Toledo third week is the same as last year. The Western roads are suffering severely from the blocking up of produce, but they will have the benefit hereafter of the present inactivity. The Hudson River, Harlem, Central, and Erie, are all showing fair gains on last year, although affected somewhat by the same causes as the Western

Annexed are the figures of the annual report of the Brooklyn City Railroad for the year ending Sept. 30:

November show a decrease of some \$17,000, as compared with the earnings of the corresponding month

The Marietta and Cincinnati shows a falling off of about \$60 for November, as compared with the same month last year. The nineteenth report of Wm. Key Bond, Receiver

of the Cincinnati, Wilmington & Zanesville Railroad, has been filed with the Clerk of the United States District Court:

A quarterly dividend of \$3 has been declared by the

Hartford and New-Haven Railroad Company, payable on the 2d of January next. The Western Railroad of Massachusetts has declared a semi-annual dividend of 4 F cent, payable Jan. 1. The Atlantic Bank of Brooklyn a semi-annual dividend of 5 & cent, payable Jan. 2. The Emigrant Industrial Savings Bank has declared its usual semi-annual dividend, payable on the 21st of January, at the rate of 6 \$\psi\$ cent \$\psi\$ annum on sums of \$500 and under, and at the rate of 5 \$\psi\$ cent \$\psi\$ sums of \$500 and under, and at the race of 5 v cent v
annua on larger sums. The coupons of the Jackson
County, Ohio, bonds, due on the 1st or January, will
be paid after that date at the Ocean Bank in this city.
The coupons on the Jersey City Water Loan, due Jan.
1, will be paid at the Continental Bank. The Mercantile Fire Insurance Company 6 P cent, payable on the 2d January. Interest coupons of the Third Mortgage Bonds and bonds of 1872 of the Harlem Railroad will be paid on and after Jan. 2, 1861, at the Treasurer's office, corner Twenty-sixth street and Fourth avenue. The interest due on the bonds of the Cleveland and Toledo Road, due 1st January, will be paid at the Corn

Exchange Bank. The City of Manchester brings \$38,000 in gold, and we send to-night \$200,000 to New-Orleans. The banks held this morning \$24,000,000, and there is probably \$3,000,-000, in the Assay Office and elsewhere, including the million in the Canada, not counted by the banks, making \$27,000,000. This will be somewhat increased before the new year comes in, when the payments on the Treasury notes will temporarily reduce it. This in flux of gold insures an easy money market for some time to come. It is understood that after the average of specie in the banks to net deposits reaches 25 \$ cent the daily equalizing policy will be abandoned, excepting in reference to such banks as fall below that average. Some amounts of gold are going to Baltimore in preparation for the annual statement. There is no marked change in the money market, but the tendency

is to lower rates. To-day was the latest time at which bids for the new Treasury Note loan could be put in here. The amount npon which deposits of 1 & cent were made did not reach the aggregate asked for, and if New-York is relied upon the loan as a whole will be a failure. A combination bid was, however, gotten up by the exertion of the Sub-Treasurer, Mr. Cisco, which, with the other bids, will give the Government money enough to carry them over into January. The rates of the bids were not known, but it is supposed the Notes will be taken at 7 to 10 F cent interest.

The Domestic Exchanges are again easier. On Philadelphia the figures are 1@11 & cent, and on Baltimore 11/211 & cent discount. On New-York, at St. Louis and Chicago, the rate is 9 & cent premium.

There are no new developments of any importance in egard to the bonds abstracted from the Interior Deartment. The Stock Board has declined to take any action upon them not withstanding several cases, where bonds of the advertised numbers have been refused by boying parties, have been before it. Parties holding the stolen bonds have given notice in many cases to those of whom they were purchased, that they are held responsible, but this is considered merely a form, as it is generally conceded that the bonds in the hands of innocent parties are safe against say claim made by the Government. It is understood that other injunctions are being prepared against parties supposed to hold some of the bonds, but we think Wall street is too shrewd to be caught by Bed Tape. The published list of numbers of the State bonds is either accerect, or the robbery must have commenced longer ago than has been stated. One party has had some of the bonds, as admitted, in his possession for two years, and collected three coupons, and others have uppeared in the street which have been for some time in the Bank department of Wisconsin. It is extremely important that a correct list of the abstracted bonds Pacific Mail Steamship Co., 83; New-York Cented Railroad, 75; 275; Brie Reilroad, 35; Hudgon Rivshould be published by the Government

The following decision of the Treasury Department, made in 1854, appears to have an important bearing upon what party the loss will fall on in this matter:

The serve Bergarrant, Nov. 7, 1854.

* In reply to your isquiry respecting compon certificates.

Nos. 1,058 and 1,129 of the same loss (1848), I have to state that they have not been sent here for referration. Being payable to heaver, any person who may here purchased them in good faith, and for a full consideration, is legally entitled to them, as sugrested in my letter of March 9 last. This Department has no power to issue any new certificates in favor of any former holder, or to pay the amount of these unless produced, as either course would increase the debt of the United States to that amount, which can only be done by the express authority of law.

There has been no movement in the general Dry Cleadarands during the next week. The season of the

Goods trade during the past week. The season of the year, with its usual festivities, would have prevented activity in business, even if the paralysis, laid upon new enterprises by the disturbed condition of the country, had not existed. The opening year may nduce greater activity; but we do not expect onehalf the volume of trade during the next three months, as was witnessed in the corresponding period of last year. If the secession troubles should at once be disposed, their baneful results would be experienced long after the immediate causes had ceased. The shock given to credits—the derangements of the currency of the country and the want of confidence among the mercantile classes generally, will affect seriously the business of the world, and the manufacturing industry of the country will not be an exception. Thus it is wisdom on the part of our manufacturers to restrict their productions to the lowest limit which economy will admit of and bumane considerations suggest. The Cotton market continues to harden, and the tendency is evidently apward. This is a good feature for the manufacturers at the present time, for if the productions can be kept within reasonable limits of the demand for consumption and exportation, the present prices of goods will be more easily maintained. The chief causes of this advance, at a time when our spindles are not fully employed, and the trade of the country is in a great measure destroyed, are seen in the short crop as compared with the previous year, and the impossibility of forwarding the Cotton from the interior to the seaboard. The tightness of money at the South prevents the interior factories from making purchases, and thousands of bales are awaiting the events of the next few weeks, that the needed facilities may be af-forded. Meantime, English spinners are becoming restive, and fear that the revolution at the South may assume such a formidable aspect that the crop of the coming season may be even less than that of the last year, in which event the staple may be carried up in price fabalously.
